Flightstar Announces Re-delivery of its 15th 757-200PCF Conversion

JACKSONVILLE, FL, -- February 24th, 2009 – Flightstar Aircraft Services (Flightstar), a leading provider of heavy aircraft maintenance and modifications, is pleased to announce that the company has re-delivered its 15th, full fifteen pallet 757-200PCF for Precision Conversions. The converted 757-200PCF is owned by Cargo Aircraft Management (CAM), a subsidiary of Air Transport Services Group, Inc.

Jerry Hernandez, Flightstar's President stated, "With the re-delivery of the CAM 757-200PCF, Flightstar celebrates its 15th conversion for Precision Conversions." He added, "The solid relationships we have built with Precision and other B757 customers, demonstrates our particular expertise with the aircraft."

Flightstar began converting B757-200 aircraft for Precision Conversions in November of 2006 with the commencement of a seven aircraft conversion agreement and has since continued to serve Precision Conversions' modification and maintenance requirements for additional customers worldwide.

About Flightstar

Based at the Cecil Field Commerce Center in Jacksonville, Florida, Flightstar Aircraft Services, Inc. (www.flightstarjax.com) is a leading provider of heavy maintenance and inspection services as well as modification services for narrow body air transport category aircraft. The company specializes in Regional Jet, MD80, DC9, B727, B737 and B757 aircraft. Services include all levels of scheduled maintenance from daily line checks to heavy depot level maintenance. Additionally the company provides engine changes, complete avionics modifications, structural modifications and upgrades, reduced noise level modifications and

passenger-to-freighter conversions. Flightstar is an FAA approved repair station (certificate # FOTR986N).
